

**PLEASE READ THIS SHEET AND THE
ATTACHED INSTRUCTION MANUAL
BEFORE INSTALLING YOUR LAMPSHADE**

*SOME OF OUR LAMPSHADES MAY NEED A
SMALL 'MINI GLOBE' BULB DEPENDING ON
THE SIZE OF YOUR LIGHT FITTING.*

**THE BELOW LAMPSHADES WILL REQUIRE A
SMALL 'MINI GLOBE' BULB.
STANDARD LIGHT BULBS WILL BE TOO BIG.**

Oval Drum

Decorative

Pendant

Slim Geo

Wide Geo

Slim Pendant

**ALSO ON SOME OF OUR LAMPSHADES
THE ENDS NEED TO OVERLAP**

On our Oval and some of our other shades
the ends need to overlap in order to make the
magnets meet.

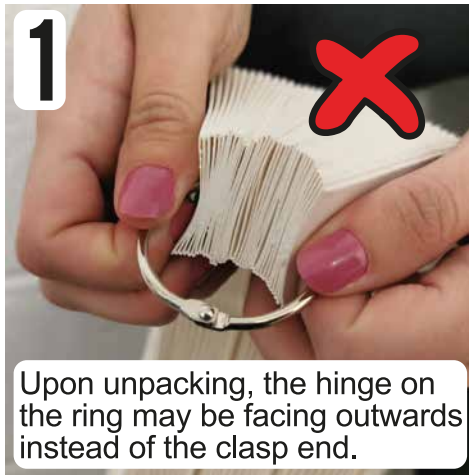

If you just push the ends together the magnets
won't meet - you will need to fold one end over
the other and the magnets will then meet
and that will also hide the join.

SOME MODELS REQUIRE A SMALL BULB: 'MINI GLOBE' 45x75mm RECOMMENDED FOR:
OVAL DRUM • GEOMETRIC • SLIM GEOMETRIC • WIDE GEOMETRIC
DECORATIVE CHANDELIER • PENDANT • TUBULAR SLIM SNOWDROP PENDANT
• **RECOMMENDED MAXIMUM WATTAGE: LED BULB of 3w-8w** •

READ THIS BIT ASWELL

OUR OVAL LAMPSHADE HAS VELCRO - TAKE CARE WHEN RE-OPENING THAT THE PAPER DOESN'T RIP.

HOW TO INSTALL

1 Upon unpacking, the hinge on the ring may be facing outwards instead of the clasp end.

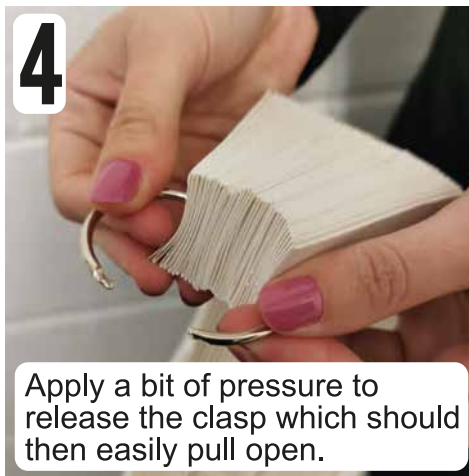

2

Carefully feed the ring through the paper holes until the clasp end is facing outwards.

3 Try to get the clasp end as centre as possible so it's easier to open and fit.

4 Apply a bit of pressure to release the clasp which should then easily pull open.

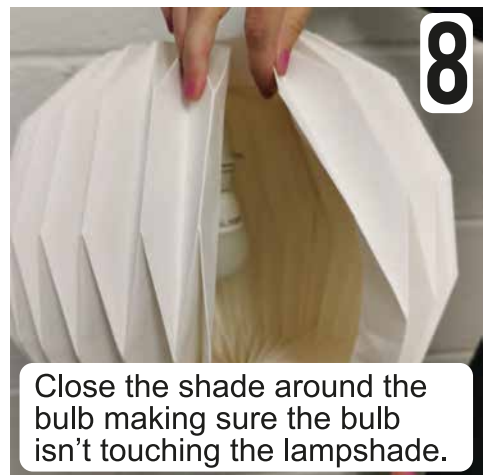

5 Place the open ring around the lamp cord just above the fitting. Close the ring around the cord, making sure the clasp ends overlap & securely close.

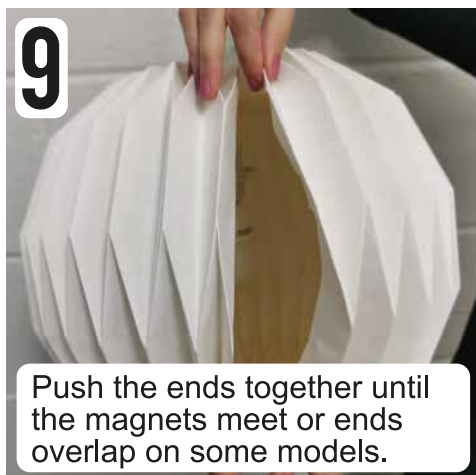

6 Lower the ring and shade as far down as it will sit on the centre of the bulb fitting.

7 Carefully open the shade around the bulb fitting paying attention to the top & bottom.

8 Close the shade around the bulb making sure the bulb isn't touching the lampshade.

9 Push the ends together until the magnets meet or ends overlap on some models.

10 Check that ends have met or overlapped correctly, hide any joins & open any closed folds!
